

Drilling equipment

Axess offers a complete solution for surveys and certification of drilling equipment in the offshore industry. Our services perform the needs and demands for the client and authorities regarding planning, execution and reporting. Axess has a highly skilled staff of engineers with great experience within HSE, planning and inspection of lifting equipment which aspire to satisfy the client's demands for a safe and effective working place.

Axess provide

- System for annual surveys and certification of fixed and loose drilling equipment
- Inspections and surveys according to national regulations, rules and the clients demand
- Commissioning, project management and third party services
- FMECA, HAZOP / HAZID, RCM and RBI analysis
- Computer aided assistance to ensure good control of the certification onboard the rig

Axess has developed an electronic register that provides a complete overview of all certification onboard the rig. This register gives the client an easy accessible system that saves the customer a lot of time. When SmartAx is installed, Axess saves time while carrying out the certification onboard, and altogether this leads to reduced customer costs.

Axess has approvals for NMD competent persons A-1, B-1 and A, and is certified as "Enterprise of Competence" by Norwegian Petroleum Directorate and Norwegian Labour Department. Axess has both drilling and operator contractors as clients, and performed in 2009 surveys onboard 45 installations.

Inspection & Integrity Management

Axess is a leading provider of inspection & integrity management, and engineering & construction services.

The business within Axess comprises the offshore, maritime and energy industries.
