

Crane department

Our crane department has specialized in advanced modifications and maintenance operations of offshore cranes. Our team consists of several top experts within the different areas of competence represented on a modern offshore crane, in addition to experienced executing personnel. Our broad experience with cranes and the cooperation between our departments give us a unique possibility of providing complete solutions for crane upgrades, maintenance tasks and crane replacements.

Typical challenges solved by Axess Crane Dep.:

- **Maintenance**

Axess has established itself as a preferred partner for maintenance of offshore cranes. Our experience has proven to provide reliable maintenance which results in safe and faultless operation. Axess has top competence within mechanic, hydraulic and electric maintenance, which also gives us the ability to perform studies of maintenance programs and do RCM analysis in order to give our customers further benefits

- **Modifications**

In order to fulfill new regulations and to ensure lasting and faultless operation, the Axess crane department has the last year done several major modifications / redesigns of control systems for offshore cranes. The use of modern technology ensures future proof solutions, ready for upgrades, and easily available spare parts.

- **Access**

New regulations demand upgrading the general access of cranes. Our access group has specialized in providing cost efficient and practical high quality solutions which fulfill these requirements.

- **Crane Replacement**

Axess has accumulated unique experience with studies, purchase consultancy, installation planning and performance of crane replacement. During numerous extensive projects we have also supplied complete pedestal analysis and design.

Axess is a leading provider of inspection & integrity management, and engineering & construction services.

The business within Axess comprises the offshore, maritime and energy industries.
